

# C10 Wall Control

## SPECIFICATION and INSTRUCTION SHEET

**DESCRIPTION:** One Ceiling Fan & Light, 3 Speed Wall Control

**ELECTRICAL SPECS:** 120 Volts, 60 Hertz, Fan 1.0 amp, Light Rating 250W Halogen, 6 Wire Installation

**FAN MODEL USED:** • The Enigma (Built-In Up Light & Optional Down Light)

## How to Wire and Operate Your C10 Wall Control

**NOTE:** If fan or supply wires are different colors than indicated, have this unit installed by a qualified electrician.

### WARNING

To avoid possible electrical shock, be sure electricity is turned off at the main fuse box before wiring. **NOTE: If you are not sure if the outlet box is grounded, contact a licensed electrician for advice, as it must be grounded for safe operation.**

**1. Setting the Code:** The remote unit has 16 different code combinations. It may be necessary to test a couple frequency code settings to improve signal reception and/or eliminate interference from other remote control household items. Multiple fans should have different code settings to allow independent fan control. To set the code, perform these steps.

- **Wall Transmitter:** Slide code switches to your choice of up or down position. Factory setting is all up. Do not use this position. With a small screwdriver or ball point pen slide firmly up or down (Figure 2a).

- **Receiver:** Slide code switches to the same positions as set on your wall transmitter (Figure 2b).

**2. Installing Receiver in Hanger Bracket:**

- Slide remote Receiver into the Hanger Bracket (Figure 2).
- Connect wires as indicated: (Figure 3)
  - Green Hanger Bracket and Hanger Ball wires to BARE (ground) wire.
  - BLACK Receiver Unit wire (AC IN L) to BLACK supply wire.
  - WHITE Receiver Unit wire (AC IN N) to WHITE supply wire.
  - WHITE Receiver Unit wire (TO MOTOR N) to WHITE fan wire.
  - BLACK Receiver Unit wire (TO MOTOR L) to BLACK fan wire.
  - BLUE Receiver Unit wire (FOR LIGHT DOWN) to BLUE light wire.
  - ORANGE Receiver Unit wire (FOR LIGHT UP) to ORANGE light wire.
- Position all connected wires and receiver antenna to allow installation of ceiling canopy.

- Install canopy using threaded rods, lockwashers, and knurled knobs.

**3. Installing Wall Transmitter (Figure 4):**

- With electrical power still disconnected, remove the existing wall plate and switch.
- Make wiring connections with wire nuts as shown in Figure 3.
  - One black wire from wall control unit to black (hot supply).
  - One black wire from wall control unit to black wire leading to ceiling outlet box.
- Attach wall control unit to outlet box using the two 6-32 screws provided.
- Attach wall plate to the switch control front using the two small screws provided.
- Restore electrical power.

**4. Operating & Using Wall Transmitter:**

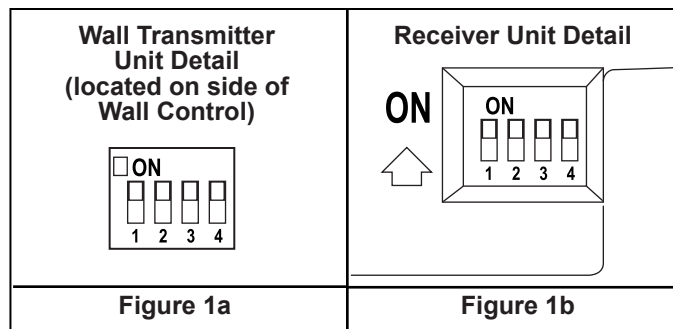

Install the Wall Control Unit in the wall. Install the enclosed cover face plate.

- HI Push Button – high fan speed
- MED Push Button – medium fan speed
- LOW Push Button – low fan speed
- OFF Push Button – fan off
- U/L Push Button – on/off and brightness control for built-in up light
- D/L Push Button – on/off and brightness control for optional down light

**NOTE:** To control either light hold down key to increase or decrease brightness. Tap key quickly to turn light on or off. The light keys have auto resume and will stay at the same brightness as the last time it was turned off.

### WARNING

Check to see that all connections are tight, including ground, and that no bare wire is visible at the wire connectors, except for the ground wire. Do not operate fan until the blades is in place. Noise and fan damage could result.
